IN GREEN PASTURES.

BY C. B. LE ROW. Cloud shadows lie Upon the soft gra-s underneath my feet, God's great infinity Wraps around in blissful rest complete: Like angel's breath I feel the air of lieaven which seems so near-

No thought of pain or death,

No want of woe can grieve my spirit here

God's hand holds mine, I lean on him in loving faith secure, And read in every line nature's book, "His mercies shall endure." I look above In thankfulness of all the good I've seen. And trusts the Father's love Who led my feet within these pastures green.

The day will end And light fade slowly till the west is gray; When He at last shall send Cold winds and heavy dews upon my way, Can I still trust His love And wait until the morning breaks again? In darkness look above And in the sunshine, when I feel no pain?

Lord, help my child To be as hopeful in the heavy night When skies are dark and wild. As in the happy day when all is bright. Let me hold fast Thy hand In death's dark valley as in pastures green,

So I at last may stand In that dear country which my faith has seen Egyptian Brick.

Some thirty years ago I lodged from Saturday to Monday with an inn-keeper in the country, who was also a farmer. On the table for Sunday dinner there was a nice piece of pickled pork, boiled the day before, On tasting it I thought it the most delicious I ever ate. I requested "mine host" to give his recipe for curing pork. He replied as follows: "As soon as my hogs are dressed and cool enough to be cut, I pack the side pieces in a barrel or cask, with plenty of salt on all sides of

Curing Pork.

each piece, and when my barrel is full I immediately roll it to my ump and pump in water until I can see the water cease to sink in the vessel or to moisten the salt on top of the cask. I then lay a flat stone as large as the vessel will admit on the contents, so as to keep the pork always under the salt or pickle. I put it in my cellar, covered so as to xclude the flies, and there it remains until a piece is wanted. Care must be taken to keep the meat under the pickle, otherwise it will

Here is the whole secret of making good pickled pork for family use. We have used the above method, and we want no better, easier, or more economical plan. It has often hapened that when we wanted to put down new pork there remained some of the old pork in the bottom of the sk. Tothat case we poured off this pie, took the undissolved salt, packed the fresh pork on top of the old, using the salt which had been in the cask, with the addition

of fresh salt if necessary, and then poured on the old pickle or water. In this way we have had pork three or four years in the bottom of our pork barrel, and when used it was as free from rancidity as it was three weeks after it was put down. Indeed, we seldom emptied our pork barrel, except when it wanted hooping. We believe that boiling pickle is useless, if not injurious. Pork ought not, if it can be prevented, to be frezen before it is put down.

The best pork that we ever saw was that from some pigs under the charge of a lad, who took as much care of them as some people do of their children. Every day he used to give them a dinner of hot potatoes, for he said that he didn't see
